

Decarbonising transport with *biomethane*

Driving fleet emissions to *zero*

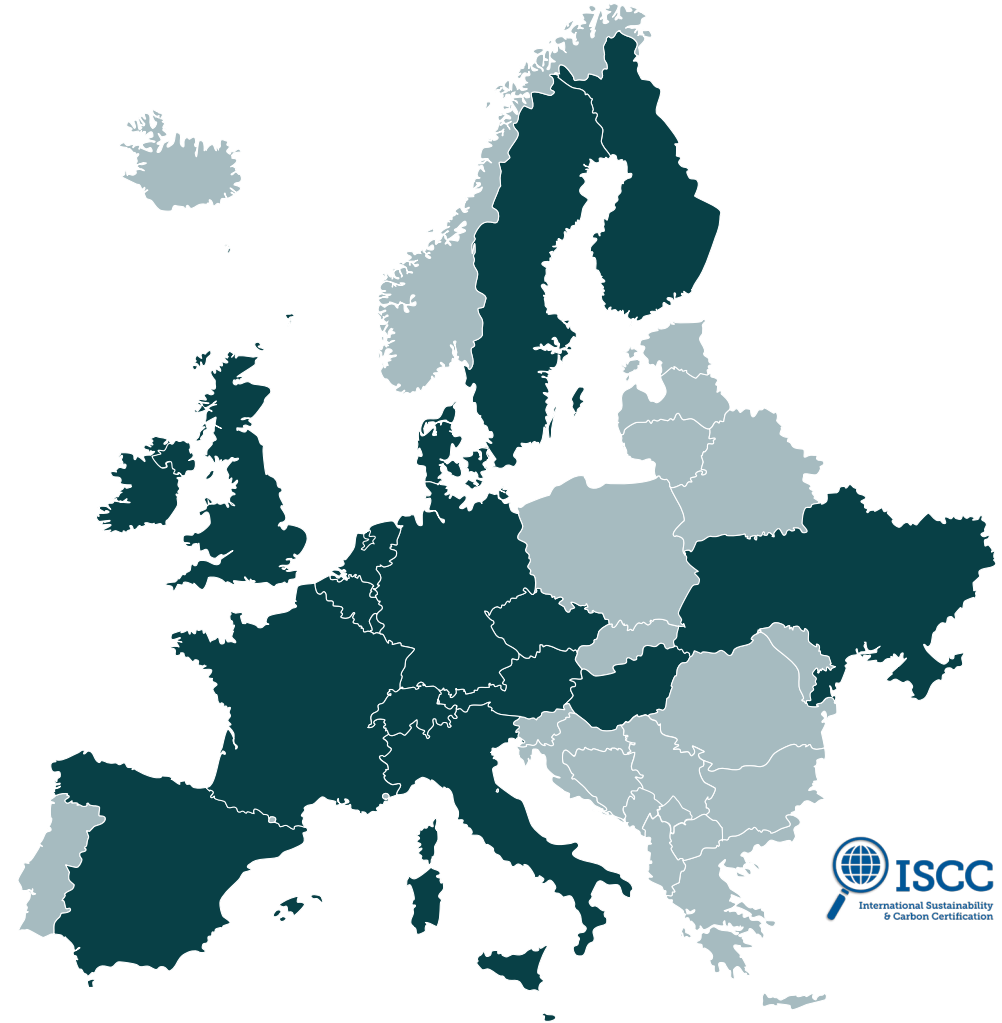

ReFuels 2026 05 01

We are *ReFuels*

Today, we are Europe's leading specialist in sourcing and supplying biomethane for transport. Since 2014, we have pioneered and scaled the biomethane market for the transport sector.

We deliver certified, unsubsidised biomethane from producers across Europe through our network of 16 UK CNG refuelling stations, powering lower-carbon transport nationwide. We aim to expand to more than 25 stations by the end of 2028, we are continuing to grow both our infrastructure and our upstream biomethane sourcing network to meet rising demand.

Through long-term partnerships with producers and sellers — backed by robust off-take agreements — we secure reliable biomethane supply for the UK transport market.

Public access stations

● Operational ● In construction

2014

CNG Fuels and Refuels established

2020

In 2020 we operated 6 CNG stations and 2 Mobile Refuelling Stations (MRS) across the UK with a daily capacity for 1600 HGVs

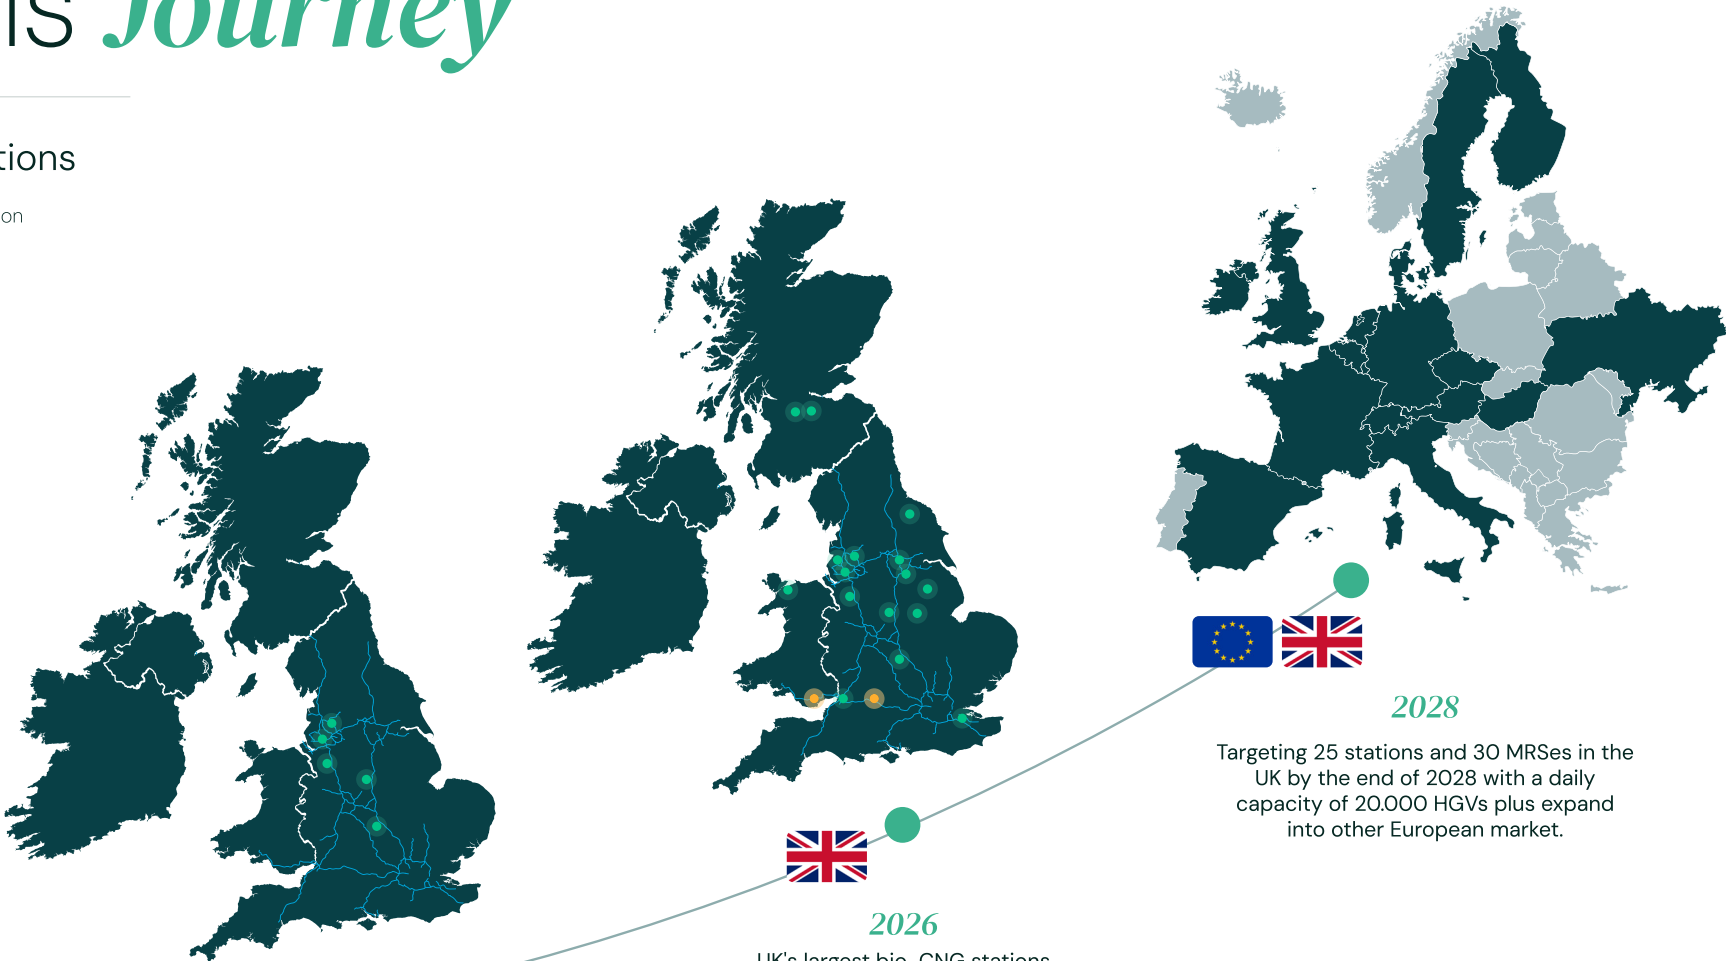

2026

UK's largest bio-CNG stations operator with 16 sites and 9 Mobile Refuelling Stations (MRS) with a daily capacity for 11,500 HGVs

2028

Targeting 25 stations and 30 MRSEs in the UK by the end of 2028 with a daily capacity of 20,000 HGVs plus expand into other European market.

Cross-border biomethane sourcing *in the* *full value chain*

We source certified, unsubsidised biomethane from production sites across Europe, fully compliant with RED III and RTFO sustainability criteria. We transport it through the gas grid to the UK and supply it directly to our CNG refuelling stations, delivering a 100% renewable fuel solution that is helping decarbonise transport.

From Well to Wheel:

A Long-Term Partnership for Scalable Biomethane

We believe in a multi-fuel future, with biomethane standing out as the only practical, technically proven, and economically viable solution available at scale to decarbonise heavy transport.

Long-term, bankable off-take contracts

We guarantee multi-year, unsubsidised revenues that lenders can underwrite—so you can build or expand plants with confidence.

Guidance through every hurdle

From permitting and grid-connection paperwork to RED III certification and audit prep, our team works shoulder-to-shoulder with yours, saving time and de-risking compliance.

Transparent, trust-based cooperation

We share market data, pricing formulas, and performance metrics openly, aligning profit incentives across the value chain.

Demand secured downstream

Our downstream partnerships with CNG/LNG station operators lock in offtake volumes, ensuring your gas moves quickly from injection point to fuel nozzle.

ReFuels is the UK's leading supplier of alternative fuels to commercial vehicles, supplying 100% renewable biomethane to heavy goods vehicles from our rapidly growing network of Bio-CNG stations.
